### Welding Helmet Auto Dark

**Description:**

- RB-26 is a high titania oxide type welding electrode for mild steel. It is widely used for welding sheets of ships, rolling stocks and automobiles, for ornamental surfacing of thick plates.
- Workability :
  - RB-26 possesses the following merits.
  - As the arc is stable and penetration is shallow, it enables welding of 0.8mm sheets.
  - Since spatter is rarely caused, beautiful beads can be obtained.
  - Slag detachability is good
  - Downward welding in the vertical position becomes easy to carry out with this electrode and results in a beautiful bead appearance.
- Both AC and DC can be used.

### Single Row Deep Groove Ball Bearing dengan Segel

**Description:**  
Single row deep groove ball bearings with seals or shields are particularly versatile, have low friction and are optimized for low noise and low vibration, which enables high rotational speeds. They accommodate radial and axial loads in both directions, are easy to mount, and require less maintenance than many other bearing types. The integral sealing can significantly prolong bearing service life because it keeps lubricant in the bearings and contaminants out.
